

SPRINGS

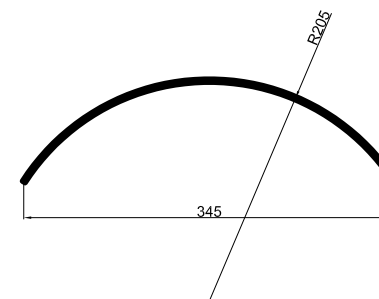

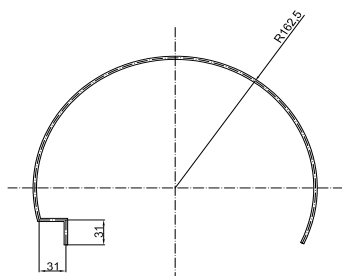

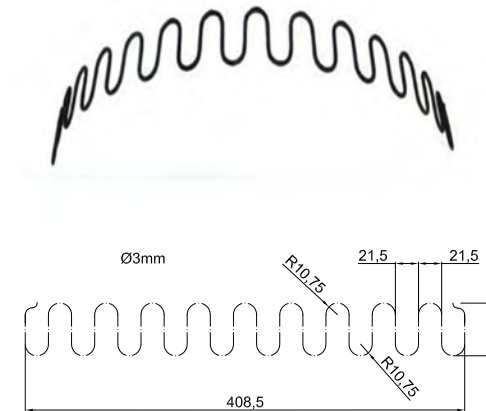

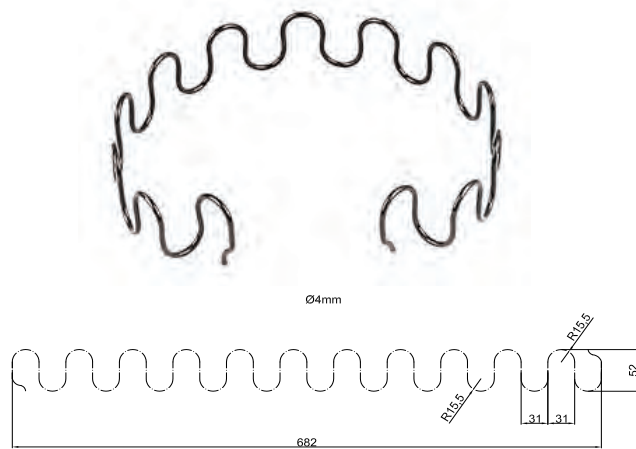

- Springs for sofa mattress
- Springs for cushions
- Springs for environmental protective bags
- Independent springs
- S-shaped springs

SINUOUS SPRING

Sinuous spring uses special material, possesses high strength, good resilience, deformation resistance and fatigue resistance.

It can ensure the durable elasticity for more than six years.

It not only extends the service life but also has an obvious improvement in effect and sensation for upholstered furniture.

GOOD QUALITY CUSHION SPRINGS

The Bonnel spring is the classic spring unit, a round helical wire connects each single spring into one unit.

The advanced machine with a unique wire process and automatic machine combined with handwork ensures every spring has no damage. It can be used with sofas and mattresses.

POCKETED COIL SPRINGS

OPTION: flame retardant (red color) OR non flame retardant non-woven.

Many types of ranks and structures possible, as per your requirements.

INDEPENDANT SPRINGS

Specialized in producing different kinds of independent springs in high quality and competitive price, Springs can be produced according to your requirements.
